The unique one-way **respiration valve**

- helps resist haze
- increases ventilation
- comfort by eliminating humidity

Memory **aluminium nosepiece**
for perfect fitting

N99CV

N99 stands for the filtration rating: 99%

The 'C' in CV stands for Activated Carbon filter.

The 'V' for the valve that manages the air flow.

1 Open the mask and expose the filter's internal valve

2 Press the "OPEN" indicator on the valve to indicate the direction of rotation

3 Remove the two valves and remove the filter

4 Replace the new filter, press "CLOSE" direction of rotation, replacement is complete
